Muhammed Shabeer OP

CTO @ PRO26 | Flutter & IoT Specialist | Building Scalable EdTech
& Enterprise Solutions

Tirur, Kerala, India

Summary

As the CTO & Co-Founder of PRO26 and Technical Head at Edutalim, I bridge the gap between complex engineering and user-friendly design. My passion lies in building scalable ecosystems—whether that's a cross-platform mobile app, a complex ERP system, or an IoT automation network.

What I Bring to the Table:

Full Stack Architecture: extensive experience deploying robust backends (Node.js, Docker, Nginx, PostgreSQL) connected to sleek frontends (Flutter, React).

Hardware Innovation: Bridging software with the physical world through IoT and custom PCB design.

Creative Edge: Leveraging tools like Adobe Creative Suite and Blender to ensure every product looks as good as it functions. I believe in "building to solve," from creating comprehensive School Management Systems to developing interactive tools like the LogicFlow game.

Open to collaborations on high-impact tech solutions. Let's build something scalable.
